CAST ARCHITECTURAL PRODUCTS & NATURAL STONE

TREASURE COVE II INC.
CAST ARCHITECTURAL PRODUCTS & NATURAL STONE

BALUSTRADES

Balustrades have graced the entries, verandas, stairways and gardens of magnificent homes for centuries.

The repetition of beautifully cast balusters capped by a custom rail provides an architectural rhythm that defines and enhances the style and beauty of your environment.

Top rails and bottom rails are manufactured in four foot lengths. Drainage weep holes are available in the BR-1 base.

Treasure Cove II uses fiberglass reinforcing rod. Each baluster has a #3 rod. The strength of our products exceeds 5000 psi.
